

Since 20 September the Electronic Database of Utility Models will be available

19.09.2007

[Database of Utility Models](#) contains the data of utility models registered in the Republic of Estonia since 17 October 1994 to the extent specified in the Utility Models Act.

The numbers of applications contain 10 digits (e.g. U200600066) and the numbers of registrations contain 5 digits (e.g. 00669).

Search in the database is free. The user needs a browser supporting JavaScript (Netscape 4.08, Microsoft Internet Explorer 4.0 or more recent versions).

Updating of the database takes place from 5 p.m. until 12 p.m. (midnight) every Thursday. Searches done at that time may not be successful.

The database is informative and does not have legal effect. Search results do not ensure the protectability of utility models and are not binding on the Estonian Patent Office in processing the utility models. For specifying the data and for the release of information or the issue of official extracts from the files of registrations and of their processing or from the Register of Utility Models, please contact [the Receiving Department](#) of the Estonian Patent Office.
