

Geographical indications databases

Geographical indications database

The database contains the data of the geographical indications registered and filed for registration in the Republic of Estonia.

More: [Geographical indications database](#)

The EU geographical indications register

[eAmbrosia](#) – the EU geographical indications register (The database contains DOOR, e-Bacchus and e-Spirit-Drinks data)

Search for geographical indications across the European Union and beyond

[Glview](#) – a portal on geographical indications (GIs). It offers the public in general, as well as specific interested parties (e.g. producers, trade mark and other IP rights holders, enforcement authorities, public administration examiners), comprehensive information on all GIs protected within the EU (including non-EU countries' GIs protected at EU level through bilateral and multilateral agreements), as well as on EU GIs protected in non-EU countries.
