

E-services

Portal of electronic filing of applications for legal protection of industrial property

New applications for registration of **a patent, a utility model, applications for validation of the European patent** can be filled in the Portal and sent to the Estonian Patent Office.

Applications filed earlier can be viewed.

The portal is in Estonian. The Estonian ID card is required for entering the portal.

E-Services

E-applications concerning legal protection of **trade marks and industrial designs**, renewal, changes in the data and transfer of rights and ownership can be filed with the Estonian Patent Office via the portal of e-services.

Moreover it is possible to file electronic revocation applications of trade marks to the Industrial Property Board of Appeal in this portal.

To file an application it is necessary to log in and identify yourself via Estonian ID card, Mobile ID or bank account.

Madrid eFiling

Through the portal, you can submit an international e-application under the Madrid Protocol, provided that you already have an Estonian national application or registration for the same trade mark. The application is submitted to the Estonian Patent Office, which will forward it to the World Intellectual Property Organization (WIPO) after the examination and, if necessary, correction of the application.

If an international application is filed, fees must be paid to WIPO (see [Fee Calculator](#)) and to the Estonian Patent Office (see [trade mark fees](#)).
