

Geographical indications database

[Search](#)

The database contains the data of the geographical indications registered and filed for registration in the Republic of Estonia.

The data of applications for registration of geographical indications is presented in the database as filed by the applicants. The number of the application has 10 digits (e.g. G200012345).

Search is free of charge. A browser supporting JavaScript is required for the use of the database.

The data is updated on the first workday of every month. If the geographical indication has been filed in figurative form, an image may be missing from the displayed data concerning applications filed during last month.

The database is informative and it does not have legal effect. Search results do not ensure the registration of the geographical indication and are not binding on the Estonian Patent Office in processing the geographical indication. For specifying the data and getting duplicates or print-outs from the Register of geographical indications or information concerning pending applications please contact the [Registry Department](#) of the Estonian Patent Office.
