

Database of the Estonian Patent Office

[Search](#)

The database contains the data of industrial designs registered or filed for registration in the Republic of Estonia and international industrial designs valid or filed for legal protection in Estonia under the [Geneva Act of the Hague Agreement](#).

The database is updated on Thursdays from 4.30 p.m. until 5.30 p.m. Searches made at that time may not provide a correct result.

The data available in the database is informative and does not have legal effect.

The data concerning international registrations of industrial designs filed for protection in Estonia under the Geneva Act of the Hague Agreement are available in the database as on the date the International Bureau sent a copy of the publication of the international registration to the Estonian Patent Office. The database does not reveal the changes made later in the international registrations.

The database is informative **and does not have legal effect**. The data of the register and the notifications published in Eesti Tööstusdisainilahenduse Leht (the [Industrial Design Gazette](#)) have legal effect.

In case of international registrations the data entered in the international register and the data published in the bulletin of the International Bureau have legal effect.
