

## **Seminar dedicated to the World Intellectual Property Day**

17.04.2017

[The World Intellectual Property Day](#) has been celebrated on the 26 April since 2000. This year, we'll explore how innovation is making our lives healthier, safer, and more comfortable. The intellectual property system supports investment, rewarding creators and encouraging them to develop their ideas, and ensuring that their new knowledge is freely available so that tomorrow's innovators can build on today's new technology.

The Estonian Patent Office, in cooperation with The Tallinn University of Applied Sciences, will arrange an [IP seminar](#) on that day in the Tallinn University of Applied Sciences.
